REDSCAN mini™ Indoor / Outdoor RLS-2020S

The REDSCAN mini RLS-2020S is an IP/PoE laser scan detector for outdoor and indoor use, providing up to 20 x 20m (65 x 65 ft.) detection range horizontally or vertically. The RLS-2020S is a compact and highly customisable detector that helps protect in an unobstructed way, houses, buildings, controlled areas by creating an invisible laser wall or plane and detecting any intrusion breaking it. For indoor applications, the RLS-2020S can be set up in high resolution mode which enables very small object detection; it can also be set up in “indoor throwing mode” allowing to detect an object been thrown into a controlled area. The RLS-2020S generates unique REDWALL Event Codes that are already integrated with many popular Video Management Systems (VMS), allowing it to trigger events. In addition, it also supports multiple network protocols for integration with VMS platforms and Physical Security Information Management (PSIM) platforms which may require HTTP/HTTPS, SNMP, etc.

With the RLS-2020S firmware ver.3, Detection range expansion mode which contributes to reduce installation costs becomes available.

**FEATURES**

- 20m x 20m (65ft x 65ft.), 95 degree detection area
- Vertical and Horizontal detection modes
- Multi-angle Adjustment Shell Structure (M.A.S.S.)
- Unique detection algorithm
- Automatic area setting function
- Advanced area setting
- 4 adjustable detection areas on IP connection
- Total 3 outputs can be assigned for analog connection
- Supporting multiple network protocols.
- Anti-rotation, Anti-masking, Soiling, Trouble, Tamper, DQ outputs (Selectable)
- Compatible with Power over Ethernet
- Paintable housing
- Indoor and Outdoor use
- Indoor high resolution mode
- Indoor throw-in mode
- Area selection
- Environmental disqualification circuit (D.Q.)
- Integration to external devices and applications with REDWALL Event Code.
- Detection range expansion mode

**SPECIFICATIONS**

EASY SETUP AND CONNECTION

PoE enabled Redscan mini generates Redwall Event Codes (REC) to all compatible VMS and NVRs through a single cable.

Detailed and complex area settings and configuration should be performed with the REDSCAN Manager software (supplied separately). Simpler detection areas can be set via the web browser.

INSTALLATION EXAMPLE

CEILING MOUNT
WALL MOUNT

Multi-angle Adjustment Shell Structure allows flexible installation on ceiling or wall for vertical or horizontal detection area.

OPTION
Optional Recess mount bracket RLS-RB

APPLICATIONS

Art protection at Museum
Protecting controlled areas
Wall protection (outdoor) at Warehouse

DIMENSIONS

OPTION
LAC-1 : Laser Area Checker
RLS-PB : Pole mount Bracket
RLS-RB : Recess mount bracket
RLS-LW : Laser Window
